The Delivery Service can be chosen by the beneficiary depending on the business model, thus being able to contract a single delivery service or several, allowing the end customer both an economic national and international delivery, as well as an international express delivery. The service is made available through partner or subcontracted networks, achieving a cheap, efficient and safe delivery. All services benefit from placing orders online, track and trace and are subject to the legislation in force in the country of origin or destination, as well as the general transport conditions of our company. Our company has the possibility of deliveries anywhere in Europe or the world both cheaply and safely through the POSTAL INTERNATIONAL service and quickly through the AIR EXPRESS service.
